New Borne Baby: NYX

By T.H. Murrey

Note: Because of the complexity and the large number of charts (over 30) the entire article along with large charts can be found at www.tradersworld.com/murrey41

New IPO March 08 2006, New Borne Baby: NYX

No Past History: knows its future 1/8th set to 3.125 after 18.75 minutes alive.
(see chart # 01):

You can have your pi but can it eat your profits?

Dr. Murrey (M.D.) delivers “baby” NYX from love of M’Spie.

Pi = 3.14 (random guess)
Murrey’s Profit Pie: M’Spie = 3.125

When you want to find a political answer, you follow the money?

If you want to know Universal Truths, you understand the number (17) or M’Spie = 3.125. 3.125 divided (10) times equals .1525875.

The (NJ) New Jerusalem: USA

USA Born: December 17, 1773
Boston Tea Party: Taxation

USA Ambassador to Israel:
Daniel Ayalan was speaking in Brentwood, Tennessee, on a Sunday night, 2006, spoke, and addressed the US as the New Jerusalem (extended):

Excerpt from The Nashville Tennessean Morning newspaper:

“Being chosen doesn’t mean having extra blessings, but extra responsibilities. It is up to all of us to keep the faith and the values upheld by Israel.

“We’re blessed to have the New Jerusalem, the United States, as an ally. This is the future. This is really the hope of the world.”

Yesterday, millions of Christians in the United States rallied in prayer for Israel as part of the fourth annual International Day of Prayer and Solidarity with Israel.

Sponsored by the International Fellowship of Christians and Jews, the event featured Christian and Israeli dignitaries speaking at churches to encourage support for Israel through advocacy and prayer.

The first observance mobilized 5 million Christians in 16,000 U.S. churches.

The fellowship supports Jewish immigration, resettlement and social welfare projects in Israel, as well as programs in the former Soviet Union.

Support for Israel among evangelical Christians is wide-ranging. Church bodies such as Bethel World Outreach and the Nashville-based Southern Baptist Convention, the nation’s largest Protestant group, committed their churches to participate in the event.

The observance at Bethel World Outreach Center in Brentwood drew standing-room-only attendance at two of the three morning worship services at which Ayalon spoke.

Other guest speakers were the ambassador’s wife, Anne Ayalon; Yigal Amedi, deputy mayor of Jerusalem; and Yigal Hayo Molad, administrative director of the Jerusalem Cinematheque, Jerusalem’s film commission, who expressed interest in organizing a music festival with Nashville in Jerusalem.

Robert Stearns, founder of Eagles’ Wings, a ministry of Christians and Jews operating out of New York and Jerusalem, helped bring the Israeli ambassador and his delegation to Bethel World Outreach in Brentwood, Tennessee.

He was speaking, to the continuing globalization, of all nations, and the importance, to work together for peace.

He addressed the importance, for all nations, to strive for the protection of one’s individual rights to pursue a safe and happy life, with the increasing protection, for Universal Intellectual Rights, from the part of individuals, who by pass “normal,” and move toward simpler ways to think, and solve obvious daily quandaries. Murrey spoke with him briefly as he greeted old friends.

Secretary of Commerce: Mickey Kantor from Nashville, Tennessee (for eight years, under President Bill Clinton), spoke at The Law School at Vanderbilt University Campus, 18.75 months ago, and he spoke to three main subjects:

1) Peace through negotiations,
2) More food production per nation,
3) Intellectual Rights Protection.

Murrey spoke with him briefly after the meeting as he greeted old friends.

Secretary of Finance: Snow, under
President George Bush, on CNBC TV, reiterated the continuing need to protect the Intellectual Rights of all high IQ people who share their knowledge for the “common good” with a simpler way.

US Senator Bill Frist M.D. from Tennessee was reported to comment to the continued efforts, to protect and individual’s Intellectual Rights for their contribution to the common good.

Murrey spoke with the Senator, briefly, at Houston’s Restaurant, in Nashville, on Wets End, the day before Thanksgivings, which was seven months before his stock HCA had moved up, on good news, then down again to the same price on bad earnings news.

No one asked him if he knew (ahead of time) about the good news, which gapped it up, they dwelled on the bad news.

It was reported to the SEC, weeks in advance, which has its books open to all NYSE members, the simple fact that 10 large HCA corporate leaders, were selling millions of their shares, from April 2005 to July 2005, and they set the earnings policy for the corporation. (see chart # 08)

Mr. Karl Icon as asked, on CNBC TV last month, “how have you made your billions?” He replied, “Find the simplest thing the average person will consume and reorder, but it must be so simple the least will understand.”

Public Record Disclaimer: 1994-95 US Library of Congress (accepted)

Total Intellectual Rights of Ownership:
(1) Google.com has 37,500 references to Murrey Math being the (only) human or computer to trade all markets off the same # or one, two or three fractals added together with no fundamentals. Trader’s World Magazine publisher, Larry Jacobs has received (only) one way to trade off (1) # Murrey Math.

Murrey owns them all:
All 384 (exact) numbers called MMTL: Murrey Math Trading Lines deduced from dividing Murrey’s 5 Master Squares: 100, 1,000, 10,000, 100,000 or 1,000,000 in ½, then divide each answer in ½ (again), (17) times and any market trading inside one of these MM Master Squares or any two or three added together will give the exact reversal price. How simple is this to understand?

No market traded on Base Ten, anywhere in the world, will reverse unless it touches one of the numbers Murrey owns the rights (to all).

Right of Public Domain:
The Math Universe of “known” random numbers exceeds 3.125 billion, so you may claim ownership of them and copyright them, but Murrey has the (only 384 numbers) all markets reverse off since October 09 1945.

Proof of Authenticity: (copyright)
1) New Innovation (never seen),
2) Proof by (exact) predictions,
3) Established over time and repetition.

1) Google.com has 37,500 references to Murrey Math being the (only) human or computer to trade all markets off the same # or one, two or three fractals added together with no fundamentals. Trader’s World Magazine publisher, Larry Jacobs has received (only) one way to trade off (1) # Murrey Math.

2) Every major reverse of the Dow 30 is off 156.25 points or 312.5. Every major reverse off the S&P 100 is off 15.625 points. Every major reverse off the S&P 500 is off 15.625.

3) Since 1995 Murrey has over 125,000 individual traders, who profess to know his Murrey Math Trading Lines. Plus, every major US Brokerage House refuses to acknowledge any market can be predicted into the future, much less off one number or its fractals. They refuse to listen.

CNBC TV has financial experts on TV everyday, and someone will ask them, “What do you see for the future of XXXX?”

The expert will say, “no one can predict it, if they could, I would follow their advice.”

They are lying and we know.

If they converted to Murrey, they would lose their credibility (how fragile it is).

Note of Interest:
On any Given Trading Day, about 70% of all market action is controlled by a handful
of institutions.

On Feb. 24, 2006, for example, just 10 firms controlled 58.86% of the $2.95 billion in shares traded on the NYSE...

1. Goldman Sachs Group: 8.45%
2. UBS: 7.63%
3. Brut LLC: 7.44%
4. Merrill Lynch: 7.13%
5. Morgan Stanley: 6.16%
6. Lehman Brothers: 4.51%
7. Credit Suisse: 3.93%
8. Bear Stearns: 1.76%
9. Jefferies Execution: 3.93%
10. Deutsche Bank: 3.82%

These giant firms can create billions in demand, sometimes in mere minutes, for whichever stock they choose. Track where they're buying next and add positive positions to your portfolio.

**Bet to all brokers:** T. Henning Murrey will invite any person, off the street, to predict any market, with no more information, than five years of past data, and The Murrey Math Trading System Software Program, created 1994-95 with only one # multiplied or divided (17) times, (the same number); then the software will pick, one two, or three of the these (17) numbers, and add them together, and any market you trade will reverse off it, they, or them.

1995: T. Henning Murrey was the recipient of The “Holy Grail” Award.

This award goes to the trading “guru,” who professes to tell everyone, the most, he has “any” market “figured out.”

1993: T. Henning Murrey won this award, and has retained it for 12.50 years, since he has figured out all markets, and the “brokers” keep telling their clients Murrey is weird and wrong.

A Baby is born: NYX (see chart # 03)

NYX had its inception years ago as a non-profit club. Then, it added its parenting with (AX) an online trading exchange. March 08 2006, it was born at 67.00. It is a combination of “current” values of the New York Stock Exchange and (AX) Archipelago.

1,300 Floor Traders (NYSE) were anticipating the birth of their “baby” NYX. They traded their seats for shares of paper. What will it be worth in 60 days? All stocks are to move higher.

Now, how does an experienced Ivey League “genius” figure its normal growth pattern of NYX from its conception: Words or Math?

New York City has the most powerful,
intelligent, well informed and profit-motivated “individuals,” who will tell you, they know more about any stock, than the man standing next to him, in the same “pit.”

Mark Twain said, “the biggest liars or best performers, even when they are wrong are preachers, magicians, and stock brokers.”

New York City has 1.5625 billion dollars worth of computers analyzing 5,000 stocks per second, and they know, exactly, where each will reverse, in the future, and they pass on these recommendations to their clients daily.

Jim Kramer, from Harvard and Joe Kerning from M.I.T. and T. Henning Murrey from mit (small caps) Murrey’s Institute of Thinking will tell you they (3) know exactly where NYX will reverse as soon as it is “borne.”

There were 100 different web sites and “blog” groups started, to predict its (NYX) EBA Da and EPS ratios the 1st quarter, but it keeps falling.

If you draw any square, and assign any vertical height to it, you may find its Triple Double (4 Square): 1 x 4 = 4 x 4 = 16 x 4 = 64 (trigoly) growth.

This country uses math (addition) set to base Ten, so our base (10) x height (10), would keep Logic consistent, if we set our square to 100: Ninety plus one.

Price and Time must be proportional: So we set Price (100) to the Four Square (13 week) or 64 days, so we find 1/64th = 1.5625 or 1/32nd = 3.125 Murrey’s M’Spie. Find 3/8th and 5/8th of 100.

So, Logic tells us the nearest Major Internal Murrey Math trading Octave shall be: 62.50 (5/8th), and 67.00 is over 3.125 points and below 6.25 points, so our vertical side will equal 3.125, and our 22.5 degree angle to the right, representing 51213 will equal 1.5625.

Logic forces us to accept, if vertical side (A) equals 3.125, its 1st Murrey Double would be 6.25; then its 2nd Murrey Double would be 12.50; and its 3rd Murrey Double would be called Murrey’s Triple Double: 25.00, so we add 25.00 to 62.50 and it equals 87.50 as its future MM 8/8th, after its “birth” 67.00.

Now, since it jumped out of its mother’s body (building) on Wall Street, it should move up toward 625, or 1/32 of 100, measured from 65.625 and move up + 25.00 to its top of its head to be 90.625, which is +1/8 above MM 8/8th at 87.50.

The “birth navel” of NYX will be 75.00, which will set Vesica Piscis as its center thought. We will look at its 1st hour of birth and find the waist of (ii) and it will trigger a future support or resistance, if it comes back down.

Law of Murrey:
If it cannot close above its MM + 2/8th, it will have to come back down and touch its MM 4/8th “navel.”

Law of Murrey:
If it closes, a “baby” 2/8th below MM 3/8th 37.50, it will fall to 65.625, 62.50 or 59.375.

Law of Murrey:
If it closes below MM – 2/8th 56.25, it will (have to) frame shift lower and reset at MM 8/8th 87.50 and MM 0/8th 37.50, so MM 3/8th would be (MM 1/8th = 6.25) 6.25 x 3 = 18.75 + 37.50 = 56.25. (see chart # 06).

This “baby” stock (NYX) has to fall (lower), if it closes below 56.25.

Please look IPO’s at: (see chart # 02):
1) NYX: opened at 67.00, Mar. 08 2006,
2) BOT: opened at 81.00, Oct. 10 2005,

The CME Chicago Mercantile Exchange opened as an IPO, and traded between 37.50 and 50.00. (see chart # 04):

Last week it (CME) was trading between 375.00 and 500. (see chart # 05):
Do you see it is trading on the same MM Numbers, except in a larger Murrey Math Master Square?

Historical Note:
April 22, 2006: Santa Ana, California:
Murrey Math “Coaching” Class: guest speaker was past board member of CME and said he owned shares. He told the class, “there is no holy grail.”

He spoke to the stock, CME. He said with the addition of Chinese stock trading coming on board, it should move up toward 625 or 650.

While he was speaking, Murrey pulled up a 64 day chart of CME. It was setting on MM 8/8th, up + 125 points, or + 8/8th from 375.00.

One of Murrey’s students spoke out and said: “It looks like a great short, with the gap to be filled down at 453.125,” Murrey agreed.

Monday: early after the open, it (CME) move up + 3.125 points above 500 and the 500 Puts (May) CNMQT were selling for $18,750: (see chart # 15).

Results: Five days later: it was down to 450.00 and the 500 Puts were worth $48,500.00. This stock shot up fast, in three years, form 50 to 500. Why shouldn’t someone take a profit?

Most traders from the “old school,” will not convert to a simpler trading system.
Murrey has an inherent problem:
1) traders are too lazy to listen,
2) too eager to change the truth,
3) too ashamed to admit any error.

How can any genius (over 168 IQ) present a moron trading strategy, to anyone, if the higher "authorities," will say it’s a lie, or will not work, over time, if it is 3% better than their present "random guess" bull shit trading strategy?

Folks, every trader (with any money left), after using the Buy and Hold Trading Strategy, laughs at experts, who say there is no “Holy Grail” Trading System, if they use Murrey’s software.

The Murrey Math Coaching Academy, started in 1993, in Henning, Tennessee, has teenagers, who are children of successful students, who know more about trading for profits, than 87.50% of all MBA graduates from the top twenty Universities in all of the USA. Why? They can “convert.”

There is not one USA University MBA Program “teaching” or “coaching” 100% technical analysis set to Murrey Math.

They are still stuck in the “outdated” Elliott Wave and Fibonacci: random .382% and .618% of any random bull shit last high or last low. That’s wrong.

Historical Truth: All Elliott Wave “gurus” are saying to short the S&P 500 down to 1,111, but we keep getting rising earnings and more durable goods.

You choose your philosophical cross roads:
1) Accept it, and start trading,
2) Steal it, and claim it as your idea,
3) Try to improve on Perfect Logic.

Humans who are weak (mentally) want irrational numbered trading systems.

Normal humans want simple, rational numbers, repeated which predict any market’s reverses.

If any trading system works, it must have the same affect, on the same price as it moves from Murrey’s master Square to the next Master Square.

Example:
1) NYX – high reversal down 90.625, new baby IPO, 2006, (see chart # 06),
2) IBM – high reversal down
3) 90.626, 2006, (see chart 6a),
4) BRK.A – high reversal down
5) 90,625, 2006, (see chart 17)
6) Dow 30 2002 a/f t er lows at 7,187.50 on October 09, 2002 moved up exactly + 1,875 and stopped at 9,062.50.

Please go back up and pick one of the four groups, which will allow you to make the most money off what (you) have been taught and you are preaching to your (children) clients.

Now, only a few traders can grasp what is proposed now: accept 100% technical trading system, with the use of only one number (Murrey’s) with all fundamentals built in 18.75 minutes after the price reflects it live online.

There 112.50 other random trading systems, which will let you (imagine) what the correct last highs or lows are, so you can set your 0/8th to 8/8th.

Every brokerage house, mutual fund, and all certified financial planner, takes an oath to tell their clients, “no one knows future market direction.”

All “Old School” MBA and Graduate School Programs refuse to mention Murrey Math, since they take nine month classes to get
Dan Ferrera’s Brand New Trading Manual & Online Trading Forum!
THE KEYS TO SUCCESSFUL SPECULATION
This course presents the first complete trading manual which will clearly teach anyone to successfully trade in any market, stocks, futures, or options, in any time frame, from day trading to long term trading, beginning with very limited capital, and is totally application orientated, specifically outlining a clear trading strategy incorporating all necessary principles of money management, charting, risk management, swing trading, signal generation, the use of options and much more.

“you” ready for Wall Street, using fundamentals (only).
All high schools are afraid to show the children how to trade with Murrey Math, since the kids would be making more money than the teachers.

Financial Talk Shows all over this country tell you the Buy and Hold (trading strategy) for long term is investing, but they know you make (only) + 5% per year over time, in your mutual fund.

So, why not make + 5% and quit, exit get out, back into your money market, without any losses, till your market falls – 50% of its last run, or, if you are a (Murrey Math Student) geniuses, simply buy a (short) mutual fund, which will pay you profits, as the Dow 30 and S&P are falling? It’s only been out there 12.5 years?

President Bush told you this, but most of you are in denial, to “simple truths.”
Social Security is bankrupt along with normal IQ people in the US.

Norman Mailer was on The Larry King Show last month and he said, “This country’s youth’s IQ, is going down hill on an uphill climb. We have 10,000,000 here who are not qualified by education, speech or ambition to spend money here in this country, plus criminals from China, Russia, South America and Haiti. If you can’t speak English, read or write, how can you trade? Use Murrey Math Trading System. You need no formal education.

25% of all MBA (female) graduates are not in the financial business: they quit.

Let’s ask these high IQ women to form Murrey’s Female Financial Strategy Group, who can learn the (13) Murrey Math “numbers” (WMT) Walmart reversed off the last twelve months.”

“Please go to www.tradersworld.com web page and download one year (five charts) of Walmart stock set to the same (13) MM Trading Lines.

Its MM 0/8th was 43.75 and MM 8/8th 50.00, so it wants to reverse off .78125 on either side of these numbers, since 50 is halfway to 100. It did 30 times.

Women can learn these numbers, but men have to be “coached” to find the magic wave pattern or channel with lots of bizzle and excuses.

Walmart is the largest employer in the US.
It is not going out of business.

Their employees buy it every 30 days.
How much did they (employees) make off WMT last year? It made nothing, unless they traded it or sold short or bought Puts or sold Calls.

WMT made 30 reverses the past twelve months off the same (exact) (7) numbers placed in Murrey’s book in 1994-95.

(see charts: 09a, b, c, d and e)

Last May 2005 it traded for 47.65625 and last Friday (good) April 14, 2006, it traded for 45.3125, which was a lose of - $2,375 and 365 days of mental anguish and disgust and excuses why.

But, if you had taken the opposite direction trades off: MM 7/8th, 8/8th, or + 1/8th and gone long down on MM 1/8th, 0/8th, – 1/8th or – 2/8th, you would have pocketed $71,125 or bought 2,000 more shares free.

Wall Street brags about its Ivy League genius young adults, coming to Wall Street with another innocent, newly drug induced brain, from booze, drugs, sports gambling, strip show entertainment, post graduate binge drinking, so why are they not allowed to meet Murrey’s Math? MM takes no brains cells, or memory to accept.

It takes, only, at most, 64 IQ to use The Murrey Math Trading System.

It takes longer to tie your tie, in a Windsor knot, and brush your teeth with baking soda, than it does to pull up 50 stocks, with our software, and it has already (highlighted) the Yellows and blue or 5/8th moves,
for you, so you can enjoy your coffee instead of Maalox.

WMT was channeling between 43.75 and 50.00. Any class of economic fools, in the poorest section of Manhattan, could have seen it, if they just quit reading, and start paying attention.

Every move was reversing off .78125 cents exactly, which is 100 divided in ½ (7) times: Murrey said in 1993.

How many years would it take an Ivey League SAT Scholar to figure out?

The MBA Program in most large universities, are losing new recruits, since the reams of bs are not working in real life investing. They know it.

Murrey will come to any MBA Program and speak one day, at $37,500 and after the check is cashed, he will set up a trading fund for $25,000 in the University’s name and “coach the kids” to trade the money and pay for their own damn school fees, then pass the money down to the poor students, who don’t really want to learn to earn, or churn and burn, by using The Buy and Hold Rules.

When young MBA geniuses go to Wall Street and Hedge Funds, they have to learn a Fibonacci ratio trading system.

No major US University will spend more than 30 minutes talking about “technical trading.” Women want technical trading systems, instead of fundamentals created by lying CEO’s who are men.

The Murrey Math (coaching) Learning Academy est 1993 – 2006 has matriculated thousands of students.

Now you ask, “Are they all rich?”

How many young people pass tests on the post graduate level, then go out and choke, to consider than price.”

“Sorry bucko, it’s all price (only) when you give in” to the genius of another genius.

You will either pay Murrey, or pay the women, who are shorting your losing position, as it falls – 50% against you (men). Women love to short the men.

Education is not free: you pay to play whatever your game.

How much you pay to play, and how long it takes you, depends how hard you are to “give in” to the genius of another genius. All the knowledge is already known. You can’t improve on the simplicity of The Murrey Math Trading System, if it trades with the Base Ten.

Could you have been “too busy” to put these MM numbers on your scotch bottle last May 2005: WMT:

Short: 49.21875, 50, 50.78125 51.5625;
Long: 44.53125, 43.75, 42.96875, or 42.1875?

You don’t (even) need to be able to read English to trade WMT.

Any migrant worker, working illegally for WMT, can count (money) to 100.

They are qualified to work on Wall Street and trade WMT. If your goal is to make money, which is counted on Base Ten, why read sentences about WMT, when they are so big, no one can tell you why a $9.375 bra is worth less than one from Victoria’s Secret?

Now, the “smart” Yankee Ivey League pretty boys, with the slicked back hair and triple starched shirts are saying, “that’s luck, plus it’s too easy, there’s really more to consider than price.”

“Sorry bucko, it’s all price (only) when you pick a woman. They are going to get what they want or move on.

Fundamentals don’t count when they need a Coach purser, a dress if the shoes match.”

Is it channeling stocks or stocks in a channel? Every broker knows this.

Why not pick:

1) GE: (see chart # 10),
2) IBM: (see chart # 11),
3) KO: (see chart # 12),
4) MSFT: (see chart # 13)
5) HD: (see chart # 14).

IBM has traded between MM 0/8th 75.00 and MM 8/8th 87.50 the past year: (see chart 11a and b).

GE has traded between MM 0/8th 32.8125 and MM 8/8th 35.9375 the past year: (see chart 10a, b and c).

MSFT has traded between MM 0/8th 25.00 and 31.25 the past year.*

KO has traded between MM 0/8th 37.50
and 43.75 the past year: (see chart 13a and b).

January 2005 KO could not close 3.125 cents above its MM + 2/8th, so it had to fall back down to its MM 4/8th. (see chart 12).

Home Depot has been trading between MM 0/8th 37.50 and MM 8/8th at 43.75 since may 17th, 2005: (see chart 14a, b, c and d).

The Murrey Math Trading System End of Day Software Program will (mentally) figure out the exact MM 0/8th and MM 8/8th of all 5,000 stocks, and 25,000 mutual funds, faster than you can display them on the screen.

Murrey and Murrey’s youngest Master Level Trader (at 17) Ryan Waring, who is in public school, in Glendora, California, can do them, faster in his head, than the computer can spit them out, but you have to have an extremely high IQ to keep up with us.

Murrey and Ryan and his father and their friends practice trading, while playing golf. We trade forex.

Ryan has hit 312.5 yard on fly to dog leg left, par four and backed it up on the green. You can’t do it, sorry.

The next par-four-hole # 17, Murrey hit four iron 187.50 yards up hill, and it stopped 9.375 inches behind pin.

Torah in Genesis reports in Chapter 6, verse 17 The Floods came, when Noah was (6) 600 years old. He took (7) other people (octave) and (7) clean groups of animals to equal (70) equals Truth. The floods took (7) days to float the arc (Vesics Piscis) means Fish. The Floods floated the arc on the 17th day of the 2nd month. It landed on the mountain and after seven days, the doors were opened on the (7) month and the 17th day, after 150 days. The Vernal Equinox occurs at different days each week, always on the 17th day of Nison. Daniel was told by the Angel Gabriel to expect a man to enter the east gate, on the 10th day of Nison, and be tired on the 14th day, then come off the cross and out of the tomb on the 17th day. Did it happen? After the 3rd appearance along the Sea of Tiberius, it was reported to have to feed 4,000 with 153 fish. Add up: 1,2,3,4,5,6,7,8,9,10,11,12,13,14,15,16 and 17 to equal 153. Lucky?

Now, either go to Stone Henge or Standing Stone Rectangle or over to the Sea of Tiberius as mentioned, or recorded 40 AD by a Chinese Monk.

The American Indians are found buried in East Tennessee, as far back as 9,375 BC, with their Sacred Flute’s musical pitch set to 437.50 cycles per second.

The Pyramid at Giza has its door to the Queen’s Tomb set so the wind crosses its opening at 43.75 miles per hour.

The Tacoma, Washington Harmonic Expansion Bridge started waving to 3/8th and 5/8th above it key of “F” when the winds reached 43.75 miles per hour, thus it lost it harmony with a decrease or increase (by speed) and collapsed.

Law of Murrey Math

Please look at these different markets and see which (ones) are set to 43.75 or 437.50? Funny how everything is set to math, music, Murrey Math is Music.

http://wwwgeocentralnet/geoemetria/sampelProblem.html will help you get over being afraid of 8th grade geometry.

Golf is easier when you know MM. Trading is easy when you don’t choke. Set your 3-wood to 43.75 inches long, with 62.5 cycles per second. Try it.

Knowing where your “baby” is, has a lot to do with “who’s your daddy?”

Your “Daddy” of the Markets is Murrey Math. Join our church for higher profits.

Since 1993, T. Henning Murrey has been trading (every) market off one number, or that number divided by two, then picking one, two or three fractals and knowing ahead of price and time every reverse: the large the number the more critical the support or resistance. Murrey has taught thousands of students. Please join us and convert to simple.

T.H. Murrey is author of the Murrey Math Trading Book and Trading Frame Software.
