**All Panic Mode falling market (lows) random (except) when you set them to MM**

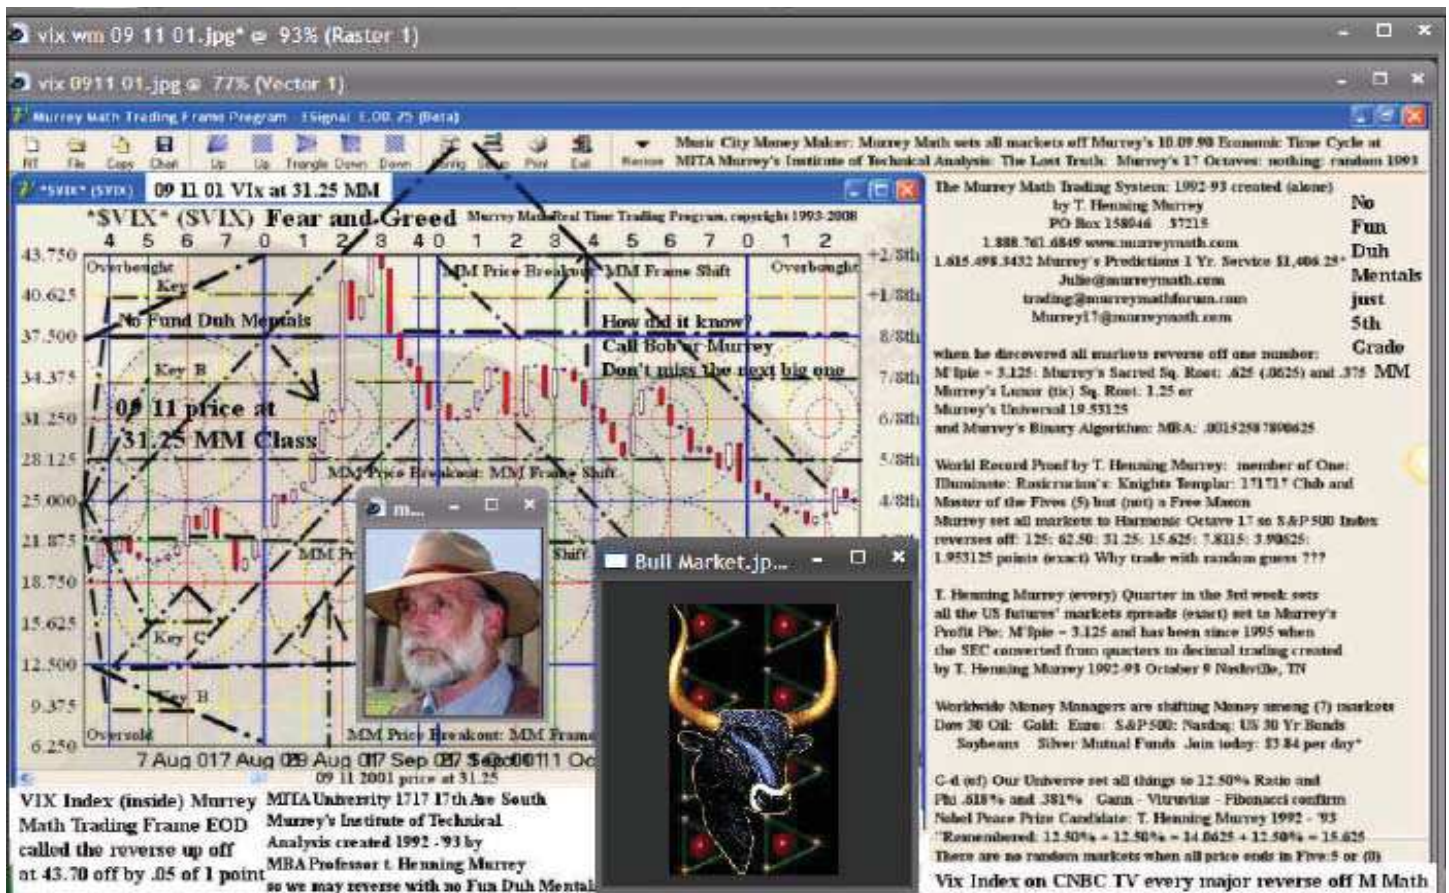

by T.H. Murrey

98.4375% (of) all normal humans go into Shut down: **Denial Mode in Extreme Conditions**

98.4375% (of) all retirement funds are **never "touched"** as markets hit AT Highs / AT Lows

98.4375% (of) all software programs **can't anticipate future highs or lows**, right?

11.11.11 11 x 11 = 121 x 11 = 1331 = 13 Mirror 31

09.10.11 Murrey's Harmonic Birthday  
Every 823 Yr Cycle (on) 9.10.11 we have 5  
Saturdays: 5 Sundays: 5 Mondays

$$5 + 5 = 10 + 5 = 15 = \text{Universal Truth}$$
$$5 \times 5 \times 5 = 125 = 12.50\%$$

Our Universe is set to 1<sup>st</sup> Binary Growth  
Progression: 12.50%

Our Universe Expands from 12.50% +  
1.125% = 14.0625% Then Binary 1.125% =  
15.625

You can't find one "live" human who doesn't  
think in terms of 12.50% minimum moves

Find one sane adult who has a job who  
doesn't work harder to make \$125.00 per  
week: 1,250: 12,500 or 125,000 per week by  
selling "cheap" items which wear out fast to  
"poor."

$\$125,000 \times 50 = \$6,250,000$  per year  
salary for increasing ambition

Pro Football Players: Pro Baseball Players:  
Pro Basketball Players earn \$6,250,000 per  
year

Salt of the Earth Poor love all Pro athletes  
who go from "poverty" to \$6,250,000 per year  
Average Pro Athlete has spent 14.0625  
years practicing their job not sitting the stands

Medic Hype: You can be whatever you  
Dream: Wrong\*

Vanderbilt University: Baseball Player  
**David Price** "failed" ambition produced  
\$6,250,000

Vanderbilt University: Football Player **Jay**  
**Cutler** "failed" ambition produced \$6,250,000

Vanderbilt University: PGA Golfer **Brandt**  
**Snedeker** "failed" ambition produced

## MURREY MATH TRADING SUPPLIES

The **MurreyMath Trading Frame** software program  
will automatically decide for you if a market is Over  
Bought or Over Sold, and automatically display the  
Trading Strategy whenever the Daily Price Action

The **MurreyMath Trading Frame Software** gives:

- All Gann Lines (8/8ths)
- All Vertical Time Lines
- All Squares in Time
- Entry Price Points
- Overbought/Oversold
- **Set 5 Circles of Conflict**
- Parallel Momentum Lines
- Set Speed Angles (7)
- Set Learning Mode Data
- Present "Best Entry Price"
- Present Daily Volume differential
- Sell 50% of Position Price Points

T. Henning Murrey asked the 26 (paying) students, if they had a normal IQ 5<sup>th</sup> grade child, who would get all their money at their death, would they force their children (through) their will to limit their (future) ambition by giving them a Trust Fund where their monies are invested long term off Fun Duh Mentals or "force" their 5<sup>th</sup> grade child to "see and remember"  $M'\$pie = 3.125$

Murrey's Institute of Technical Analysis: MITA University: 1992 – '93

Established so "traders" could enter and exit any market off the same (one) number, without having to read "anything," listen to economic experts, who failed to tell if and when the 1.40625 Trillion debt would get us our employment below 9.375%, when the US Congress had allowed large cap USA corporations to "ship" unskilled "workers" and high school "dropouts" jobs to China, leaving them with only TV ads about how we need more Engineers with high math skills to make plastic toys, tub socks and cotton jeans.

M.I.T.A. University: Nashville, Tennessee

President: T. Henning Murrey "saw" and "remembered" all markets are growing and contracting inside one or up to 17 Internal Harmonic Trading Octaves, set to Murrey's Binary Algorithm: .00152587890625.\*

MITA University President: T. Henning Murrey won the 1993 Algorithm Award:

With MBA: .00152587890625 when he "discovered" and "remembered" from Oct 09 to 17<sup>th</sup> 1959 all "things" are traveling inside its largest most "current" octave set to its "mean Joe Green" moving average: Random Fourier Wave Transform Repeated Pattern.

Murrey "remembered" the works of: Peter Guthrie Tate and his Rings "Knots" Theory of repeated special rational interlocking perpetual "windings:" dating back to the Celtic: Druids math 1200 AD: Book of Kells.

Tate's Theory:

was to rationalize what he thought he saw to a math formula:

Math Theories must be rationalized with (other) formulas:

Fourier Wave Transform: = random moving average (repeated):\*

Mellin Transform:

Riemann's proof:

Fubini's Theorem:

Dominated Convergence Association:

Poisson Summation Formula:

Theory of Normal (rational) Distribution:

Theory of Haar:

Classical Ostrowski asserts the Archimedes Absolute Value:

Consider and Adele Ring Integers:

Hausdorff Structure:

Gamma and beat Repeats:

Schwartz – Bruhat Class Structure:

Murrey Nashville: 1992 – '93 "saw" MM 4/8<sup>th</sup> Fractals: (17): with 12.50% on either side, called the "pipe" or MM Trading Frame: MM 3/8<sup>th</sup> to MM 5/8<sup>th</sup> and closes (staying) above or below the "pipe" so many days,\* it continues in its direction up or down.

T. Henning Murrey: Nashville: "discarded" the Fourier Wave Transform Pattern: random moving averages: and all supporting Theories backing up almost rational repeats, with **Murrey's Binary Algorithm: .00152587890625** moving up or down (out) a total (of) 17, 18, or 19 Binary Internal Harmonic Trading Octaves with (slower) trading inside its 17 Major MM trading Frames:  $17 \times 17 = 289$ .
